DETAILED ACTION

Election/Restrictions

This application contains claims 11-22,26-33 are drawn to an invention nonelected with traverse in Paper No. 8. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Specification

The disclosure is objected to because of the following informalities: pages 4,5, of the specification there are numerals with brackets which are not shown in the drawings (<110>, <111>).

Appropriate correction is required.

Claim Objections

Claim 9 is objected to because of the following informalities: the claim contains eference numerals (<110>, <111>) which are not shown in the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1744

Claims 1,2,4-7, are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 895 276.

Figure 7 shows the embodiment which reads on the claimed invention. Figure 7 shows a monolithic body (2) with a buried channel (31), first and second access cavity (31,32), a suspended diaphragm (30) with an electrode (18).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0 895 276.

In *Gardner v. TEC Systems, Inc.*, 725 F.2d 1338, 220 USPQ 777 (Fed. Cir. 1984), cert. denied, 469 U.S. 830, 225 USPQ 232 (1984), the Federal Circuit held that, where the only difference between the prior art and the claims was a recitation of relative dimensions of the claimed device and a device having the claimed relative

Art Unit: 1744

dimensions would not perform differently than the prior art device, the claimed device was not patentably distinct from the prior art device. Accordingly, the dimensions claimed are considered to be obvious in view of the EP patent.

Allowable Subject Matter

Claims 8,23,25 are considered to be allowable over the prior art of record.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
